Dear Thoroughbred Enthusiast;

Thank you for your interest in Thoroughvest. We hope the following information will answer any questions you may have.

The investment method described in the Investment Guide has exceeded, by more than 185%, what most professional handicappers consider an acceptable return at the track. This high profit margin, combined with the fact that the handicapping procedures are not track dependent, allows the technique to be successfully employed at most North American tracks. Although a statistically-based handicapping method does not guarantee the same returns under different testing conditions, it does indicate a probability of similar returns.

Enclosed is a sample output from our computer program, T-VEST, the same program used in 1979 and the one included with the Investment Guide free of charge. T-VEST allows a computer to perform all the necessary calculations as outlined in the Investment Guide.

T-VEST also generates the PROBABLE ODDS of the entries in a race. During the Investment Analysis test period, covering 56 investments from 2/27/80 race #1 through 3/16/80 race #9, the returns from this information alone have exceeded that of two nationally released handicapping procedures.

The #1 rated selection of PROBABLE ODDS placed 46.42% (approximately every other race) of the time and produced a $2,080.00 flat bet net profit, for an effective yield of 18.57 cents on the dollar. The #2 rated selection won 19.64% (approximately 1 out of 5) of the time with an average win price of $14.00 and produced a $4,200.00 flat bet net profit, for an effective yield of 37.5 cents on the dollar. One or more of the top 3 rated selections ran in the money every race.

INSTANT REPLAY is our computer-generated newsletter. The format is similar to an Investment Analysis of up to 23 handicapping procedures. It is released weekly and summarized quarterly. Subscriptions are by reservation and made available only to the purchasers of the Investment Guide.

Please feel free to call upon us for information or assistance at any time. It is a pleasure to be of service.

Sincerely,

Thoroughvest

THOROUGHBRED HANDICAPPING HAS ENTERED THE COMPUTER AGE

Thoroughvest is an organization of computer programmers and consultants aimed at obtaining the most valid information available on the science of thoroughbred handicapping. Their goal was to find a mathematical method which would produce a positive return on the dollar at the track. To accomplish this, a major **computer based research & development project** was started. It ended **3 years and $30,000 later.**

During that time a data base was created containing **every conceivable handicapping factor for over 16,000 thoroughbreds in over 2,000 races.** Each factor was analyzed by the computer to determine it's relative degree of importance. **Only those factors which produced the highest return on the dollar were considered for further study.** Using the proper computer programs, these factors were then tested to determine their effect on each other. This was necessary because **using too many factors to handicap a race will produce the same negative results as using too few.** After an additional **1,200 hours of analysis,** the method was completed.

Thoroughvest conducted a **3 MONTH** test at Aqueduct. **Averaging 4 or more races per day PROFITS EXCEEDED 57 CENTS ON THE DOLLAR** at Connecticut **OTB.** These results are fully **documented** and have been **certified valid.**

This record was compiled during mid-winter, the worst possible time of the year. **Many races were played during rain or snow with track conditions ranging from sloppy to muddy.**

Thoroughbred racing should not be treated as an expensive game but rather as a profitable business. When considering an investment, the main concern should be the return on each dollar. Among the nation's top investors, a 10% to 15% return per year is considered excellent. Imagine how they'd feel about **57% in 3 MONTHS!**

Even the strongest willed person lets emotion influence his decisions at the track. **Thoroughvest's investment method is a 100% mechanical procedure** that outthinks the "experts" at a price. **Personal judgments are never required.** Last minute track information, post parade and paddock inspection were proven unnecessary.

Consultant Robert F. Leonard, being duly sworn, deposes and says:

From January 31, 1979 to April 21, 1979, following the procedures set forth in Thoroughvest's Investment Guide, showed a profit exceeding 57 cents on the dollar at Aqueduct, based on non-progressive wagers through Connecticut OTB.

Commissioner of The Superior Court,
Connecticut

When Thoroughvest began their research 4 years ago, the computer boom was not anticipated. Inevitably, similar projects will be started due to the present availability of low cost computer systems. Having enjoyed a one year advantage at the 3 major racing circuits in the United States, Thoroughvest now decided to release their **Investment Guide.** All computer programs are reduced to simple arithmetic. **The guide is easy to use and to the point.** After all, it wasn't written to enrich you on the subject of racing, it just produces **a steady return on your invested dollar.** A **LIFETIME MONEYBACK WARRANTY** is included.

For those who presently own a home computer or intend to purchase one in the future, a **PROGRAM LISTING** which allows your system to make the objective forecasts is included. **It is offered free of charge and was designed to be compatible with all systems** operating with an 8K Basic and having 8K free memory. If your system meets these requirements and the program fails to execute properly, you may return it for modifications. It is one of the most complete and comprehensive programs available.

You will also receive a **complimentary one month subscription to Thoroughvest's newsletter.** Subscribers are updated on the latest developments by the computer, and the results are summarized **using Track or Connecticut OTB prices.**

If you have any questions now or need any help or advice when you receive the Investment Guide, simply write Thoroughvest and you will be answered personally within 24 hours.

THOROUGHVEST 92 ELTON ROAD KENSINGTON, CT 06037

☐ Please send me the Investment Guide by first-class mail. I understand that it is offered with a Lifetime Moneyback Warranty. I enclose $50.00 to cover all costs.

Although Thoroughvest's Newsletter is invaluable to all handicappers, results are summarized, at this time, only for Aqueduct, Belmont and Saratoga. For your complimentary one month subscription, you may choose between Track or Connecticut OTB prices. ☐ Track ☐ Connecticut OTB

☐ I do not own a home computer, but include the free Program Listing.

☐ I own a _____ computer system, include the free Program Listing.
